

**LAKE MANAGEMENT OPTIONS AND VEHICULAR CONNECTIONS SURVEY**

The options of addressing the continual issue of sediment accumulation within Lake Accotink were initially shared with the community in May 2016.

Additional information was shared at a community meeting in January 2018. The community was asked to express their preference regarding the management of Lake Accotink as well as the possibility of establishing a vehicular connection between the two primary parking areas. The information below reflects the responses received at the January 2018 public meeting and through the project webpage between January 22, 2018 and the end of the day on May 28, 2018.

<b>LAKE MANAGEMENT OPTIONS</b>	
NO OPINION	10
OPTION A - NO DIRECT MANAGEMENT	34
OPTIONS B - CONTINUE CURRENT DREDGING METHOD	211
OPTION C - DREDGING WITH FOREBAY	637
OPTION E - SINGLE STREAM CHANNEL	90
OPTION F - STREAM CHANNEL WITH SMALLER LAKE	328

<b>VEHICULAR CONNECTION BETWEEN PARKING LOTS</b>	
NO OPINION	309
CONNECT FOR EMERGENCY ACCESS ONLY	347
CONNECT FOR GENERAL TRAFFIC	314
DO NOT CONNECT	336
